

Cooling Tower Water Treatment Programs

- Scale and corrosion Inhibitor
- Dual biocide program
- Yearly legionella testing
- Yearly shock treatment
- Expert recommendations

Boiler Water Treatment Programs

- Internal boiler water treatment chemicals
- Oxygen scavengers
- Condensate treatment
- Expert recommendations

Hot and Cold Closed Loop Treatment

- Volume studies
- Leak detection
- Cleaning and flushing
- Chemical treatment
- Glycol
- Noninhibited glycol
- Inhibited glycol
- Pre-mixed Inhibited glycol with DI Water

Consulting

- Trouble shooting problems
- Optimizing water and wastewater treatment systems and chemistries dosages
- Complete treatment system overviews
- Developing Standard Operating Procedures
- Daily operator water testing logs
- Client specific concerns and requests

Training

- Wastewater treatment operator training
- Boiler and cooling tower water treatment training
- Site specific training

Wastewater Treatment Programs

- Metal removal
- Proprietary metal precipitants
- Sludge reducers
- Resist stripper treatment
- Hazardous waste stabilization
- Coagulants: inorganic, organic and proprietary
- Oil/Water treatment
- Hexavalent chromium reduction
- Cyanide destruction
- Suspended solids removal
- Flocculants
- Antifoams

Equipment

- Boiler and Cooling Tower Equipment
 - Water softeners
 - Controllers
 - Probes
 - Water meters
 - Pumps
 - Boilers/Cooling towers
 - Feed water tanks
- Wastewater Treatment Equipment
 - Batch treatment systems
 - Continuous flow systems
 - Filter press
 - Clarifiers
 - Sludge dryers
 - Reverse osmosis
 - Ion exchange
 - Membrane filtration
 - Mixers and tanks
